Whats new in 4.0?

Now 4 modules in 1 with the new Vertical Menu Templates!

DHTML Rotator and Tabs

- 24 Vertical Menu templates
- New XP style tabs

Flash Image Rotator

- Role Security
- Flash Rotator is now 35% smaller

Both

- Scheduling for Date, Day of Week, Time of Day
- RSS Import
- New easier to use Admin

Whats new in 3.0?

3 modules in 1. Rotator, Tabs, and Flash Image Rotator.

DHTML Rotator and Tabs

1. Place content and modules in tabs.
2. New cross-browser compatible Fade In/Out, and Cross-Fade transitions.
3. Select which transitions you want to randomly rotate through (used to be random between all transitions, or one transition)
4. OnMouseOver activation of content.
5. Random start page
6. Random content order
7. Three content loading methods, send all data to browser, load on postback or load via AJAX.
8. 6 New rotator templates, and 14 tab templates

Flash Image Rotator

1. New Flash rotator with over 20 amazing transitions.
2. Rotate images, sizable sliding caption area which can contain custom html per image, specify url to open on click.
3. Pager can display page numbers, thumbnails, or image titles.
4. Play background music

Introduction

With digRotate 4, you now get 4 modules in 1.

1. **Rotator** rotates multiple Text/HTML and modules.
2. **Tabs** will display multiple Text/HTML and modules in a tab form.
3. **Vertical Menu** will display multiple Text/HTML and modules with a vertical menu.
4. **Flash rotator** allows you to rotate images with captions using the Flash player.

Feature Matrix:

	HTML Rotator and Tabs	Flash Rotator
Content		
Rotate Modules	✓	
Rotate Text/HTML	✓	
Rotate Images	✓ inside HTML	✓
3 modes of content loading data, AJAX, postback, and send all content to the browser. (If you rotate modules, you can't use AJAX)	✓	Not needed for flash
Role Based Security determines which content users can see.	✓	✓
Insert DNN Vendor Banners	✓	You can insert images, not use [banner] tag
Scheduling	✓	✓
RSS Import	✓	✓
Navigation and Effects		
Pager with Numbers, Titles, or disabled	✓	✓
Pager with Image Thumbnails		✓
Transitions	✓ 23 IE 20 All Browsers	✓ 25 All Browsers

Automatic content rotation	✓	✓
Template Driven	✓	
Configurable Caption Popout		✓
Random Start Page / Content Order	✓	✓
MouseOver Activate	✓	
Background AIFF, WAV, MP3 music		✓
Requirements		
Flash Player 8 or above		✓
Support DotNetNuke 4.5.5+	✓	✓
Cross browser support	✓	✓

Installation

1. Login as host to your DotNetNuke portal.
2. Go to Host > Module Definitions
3. From the Module menu, select **Upload New Module**
4. Browse and upload the .zip file you received.

After the install, the module will be available in the Modules drop down in the control panel at the top of your portal.

Then just add the module to any page you want.

Uninstalling

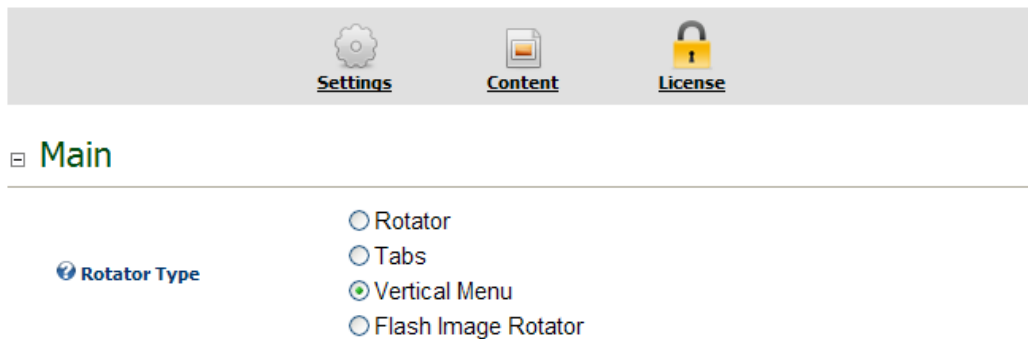

1. Login as host to your DotNetNuke portal.
2. Go to Host > Module Definitions
3. Edit the digRotate module by clicking the edit icon.

4. Click **Uninstall** to uninstall digRotate.

Setup

The first thing you need to do is choose the type of rotator you would like.

Settings **Content** **License**

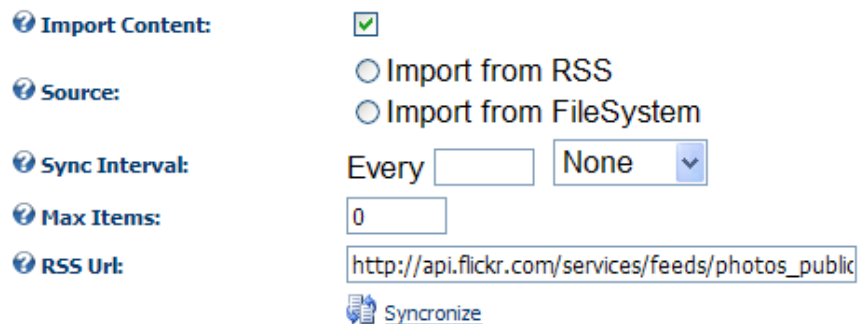

▣ Main

Rotator Type

- Rotator
- Tabs
- Vertical Menu
- Flash Image Rotator

Import from RSS

You can import the digRotate content from an RSS feed. The Rotator, Tabs and Vertical Menu will use the RSS Title and Description from each item. The Flash Image Rotator will use the enclosure image. If there is no enclosure image, it will extract the first image from the RSS Description.

Import Content:

Source: Import from RSS
 Import from FileSystem

Sync Interval: Every

Max Items:

RSS Url:

Source

Import from RSS imports from RSS feed. Import from FileSystem (Flash Only) will import images from any directory withing the portal home directory.

Sync Interval

How often do you want the items to be imported. See the [Scheduling RSS and File System Updates](#) section for further detail.

Max Items

Maximum number of items you want to import

Rss Url / Filesystem Path

Where you want the content imported from.

Settings

The Rotator, Tabs and Vertical Menu give you all the same functionality. The primary difference is that you want to change the template to choose an appropriate style of Rotator, Tabs, or Vertical Menu. Also typically tabs are not auto advanced, however with digRotate, you can choose to have the Tabs automatically advance.

Settings

Template:	<input type="text" value="VMenu-Black"/>
How to load the content:	<input checked="" type="radio"/> Send ALL content to browser <input type="radio"/> AJAX (Text/HTML only, no modules) <input type="radio"/> PostBack
Force Content Width:	<input type="text" value="699"/>
Force Content Height:	<input type="text"/>
Auto Advance:	<input checked="" type="checkbox"/>
Auto Advance Delay:	<input type="text" value="5"/> seconds
Random Starting Page:	<input checked="" type="checkbox"/>
Randomize Content Order:	<input checked="" type="checkbox"/>

Template

Specify the template you would like to use for this digRotate instance. See templates below for information on templates.

How to load the content

1. Send All content to browser will send all the content items to the browser. DigRotate will not have to go back to the server for more content to rotate.

2. AJAX will load the content through an AJAX callback to the server. This reduces the amount of information initially loaded to the browser, but the browser will have to request more information from the server as it rotates content.
3. Postback will not autoadvance the content until the browser page is refreshed.

NOTE: When you choose to rotate modules, some will not work properly when their content is retrieved through an AJAX callback. If the modules is not working property, choose Send All Content To Browser

Force Content Width & Force Content Height

- You can specify the width and height of the digRotate module. If you specify 0, the width will be 100%, and the height will adjust to the size of the content.
- This can give a jumpy feel to the module

Auto Advance

- The content will automatically rotate.

Auto Advance Delay

- The number of seconds digRotate will pause before it loads the next content.

NOTE: This does not include any transition time. The delay will begin after a transition is completed.

Random Starting Page

- A random start page will be selected, if this is not selected, digRotate will start with the first page.

Randomize Content Order

This will present the content in a random order. If you have pages 1, 2, 3, 4, this option may change the order to be 3, 4, 1, 2. The pager buttons will still display 1 2 3 4 even though the content order is different.

Additional Flash Settings

Settings

Force Content Width	<input type="text" value="400"/>
Force Content Height	<input type="text" value="300"/>
<input checked="" type="checkbox"/> Auto Advance	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Auto Advance Delay	<input type="text" value="3"/> seconds
<input checked="" type="checkbox"/> Random Starting Page	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Randomize Content Order	<input type="checkbox"/>
<input checked="" type="checkbox"/> Show Loader	<input type="checkbox"/>
<input checked="" type="checkbox"/> Content Background	<input type="text"/> 
<input checked="" type="checkbox"/> Show Caption	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Caption Position	<input type="text" value="Bottom"/>
<input checked="" type="checkbox"/> Caption Size	<input type="text" value="100"/>
<input checked="" type="checkbox"/> Play Music	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Music Position	<input type="text" value="Top Right"/>
Link Type:	
<input type="radio"/> URL (A Link To An External Resource)	
<input checked="" type="radio"/> File (A File On Your Site)	
<input checked="" type="checkbox"/> Music	File Location: <input type="text" value="Root"/>
	File Name: <input type="text" value="Sorry.mp3"/>
	Upload New File
<input checked="" type="checkbox"/> Resize Images	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Resize Method	<input type="text" value="Resize to Fill area (no space around image)"/>

Show Loader

Show the flash loader bar

Content Background

■ This is the background color of the Flash Image Rotator

Show Caption

■ Show the sliding caption area

Caption Position

■ This is where you want the caption to appear. You can specify the content of the caption, and the color in the individual content.

Caption Size

■ This is the size of the sliding caption area.

Play Music

■ Play music in the flash rotator

Music Position

■ This is where you want the music on/off indicator to display. The music on/off indicator is a bouncing equalizer.

Music

■ You can select an AIFF, WAV or MP3 file to play as background music in the rotator.

Resize Images

■ You can have digRotate automatically resize your images. You can either: Resize to Fill Area or Resize to Fit Area. Resize to Fit area will resize the image so it fits within the rotator bounds. Resize to Fill area will fill the rotator bounds with the image, keeping the aspect ratio. Resize to Fill will leave no background area around the image.

Transitions

☐ Transitions

⌚ Transition Speed:

1 seconds

- Box In
- Circle In
- Wipe Up
- Wipe Right
- Vertical Blinds
- Checkerboard Across
- Random dissolve
- Split vertical out
- Split horizontal out
- Strips left up
- Strips right up
- Random bars vertical

- Box Out
- Circle Out
- Wipe Down
- Wipe Left
- Horizontal Blinds
- Checkerboard Down
- Split vertical in
- Split horizontal in
- Strips left down
- Strips right down
- Random bars horizontal

⌚ IE Only Transitions:

- Smooth scroll up
- Smooth scroll left
- Smooth slide up
- Smooth slide left
- Cross Fade

- Smooth scroll down
- Smooth scroll right
- Smooth slide down
- Smooth slide right
- Fade Out / Fade In

⌚ Cross Browser Transitions:

IE Only Transitions

Select which transitions you would like IE users to use to transition from one content item to the next. digRotate will randomly cycle between the transitions selected.

Cross Browser Transitions

Select which transitions you would like ALL browsers to use. digRotate will randomly cycle between the transitions selected. IE users will randomly cycle between both IE Transitions and Cross Browser Transitions selected.

Flash Transitions

Select which transitions you would like ALL browsers to use. digRotate will randomly cycle between the transitions selected.

 **Flash Transition:**

<input type="checkbox"/> Osculate out Left	<input type="checkbox"/> Osculate out Right
<input type="checkbox"/> Osculate out Top	<input type="checkbox"/> Osculate out Bottom
<input type="checkbox"/> Spring In left	<input type="checkbox"/> Spring In top left
<input type="checkbox"/> Spring In top	<input type="checkbox"/> Spring In top right
<input type="checkbox"/> Spring In Right	<input type="checkbox"/> Spring In bottom right
<input type="checkbox"/> Spring In bottom	<input checked="" type="checkbox"/> Spring In Bottom Left
<input type="checkbox"/> Vertical Blinds	<input type="checkbox"/> Fade
<input type="checkbox"/> Fade with Blur	<input type="checkbox"/> Iris
<input type="checkbox"/> Photo	<input type="checkbox"/> Pixel Dissolve
<input type="checkbox"/> Rotate Counter Clockwise	<input type="checkbox"/> Stretch In
<input type="checkbox"/> Wipe from top left	<input type="checkbox"/> Wipe from center
<input type="checkbox"/> Wipe from top right	<input type="checkbox"/> Wipe from left
<input type="checkbox"/> Wip from right	<input type="checkbox"/> Wipe from bottom left
<input type="checkbox"/> Wipe from bottom	<input type="checkbox"/> Wipe from bottom right
<input type="checkbox"/> Stripes	

Pager

Pager

 **Show Pager:**

 **Pager/Tab Position:**

 **Switch Page on MouseOver:**

Show Pager

Show the pager/tabs.

Pager Position

The pager allows the user to pause, play, move next, move right, and select individual content pages. This lets you select which position you would like the

pager to appear on the rotate module. To customize the pager, see the Templates section below.

Switch Page On MouseOver

When the user holds the mouse over a pager item, that page will become active without having to click on the pager item

Additional Flash Settings

Pager

Show Pager:	<input checked="" type="checkbox"/>
Pager/Tab Position:	Left <input type="button" value="v"/>
Switch Page on MouseOver:	<input checked="" type="checkbox"/>
Show Navigation Controls:	<input type="checkbox"/>
Pager Type:	Thumbnails <input type="button" value="v"/>
Pager Overlay On Image:	<input type="checkbox"/>
Pager Item Width:	<input type="text" value="0"/>
Pager Item Height:	<input type="text" value="0"/>
Pager Color:	<input type="text"/> <input type="button" value="X"/>
Pager Transparency Alpha:	<input type="text" value="50"/>
Item Border Size:	<input type="text" value="1"/>
Item Border Color:	<input type="text"/> <input type="button" value="X"/>
Pager Text Color:	<input type="text"/> <input type="button" value="X"/>
Pager Text Size (Pixels):	<input type="text" value="12"/>

Show Navigation Controls

This will determine if the play/pause button should be displayed.

Pager Type

There are three pager types. Pager Number which displays the number of the page, Title which displays the title you specified in the content, and Thumbnails which shows a thumbnail of the image you specify in the content.

Pager Overlay On Image

■ This will display the pager on top of the images.

Pager Item Width and Height

■ This is the height and width of the pager button.

Pager Color

■ This is the background color of the pager

Pager Transparency Alpha

■ 0 to 100 specifies the alpha of the transparency

Item Border Size

■ Border size around the pager item (thumb)

Item Border Color

■ Color of the border around the pager item (thumb)

Pager Text Color

■ Color of the pager text

Pager Text Size

■ Size of the pager item text, whether it is display pager number or title.

- Enter the caption text

IMPORTANT!!! Flash only supports a subset of html.

Supported tags are: <a> Anchor, Bold,
 Break, Font, Image, <i> Italic, List Item, <p> Paragraph, Span, <textformat> TextFormat (flash specific), <u> Underline.

For more information, visit Adobe at

<http://livedocs.adobe.com/flash/8/main/00001459.html>

Schedule

You can schedule your content to appear at certain times. digRotate will compare the settings to the Server Date/Time for calculating if the content should display.

☐ Schedule

<input checked="" type="checkbox"/> Use Dates:	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Start Date:	<input type="text" value="31"/>
<input checked="" type="checkbox"/> End Date:	<input type="text" value="31"/>
<input checked="" type="checkbox"/> Use Time:	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Start Time:	<input type="text"/>
<input checked="" type="checkbox"/> End Time:	<input type="text"/>
<input checked="" type="checkbox"/> Use Days of Week:	<input checked="" type="checkbox"/>
	<input type="checkbox"/> Sunday <input type="checkbox"/> Monday <input type="checkbox"/> Tuesday
<input checked="" type="checkbox"/> Days of Week:	<input type="checkbox"/> Wednesday <input type="checkbox"/> Thursday <input type="checkbox"/> Friday
	<input type="checkbox"/> Saturday
<input type="button" value="Update"/> <input type="button" value="Delete"/> <input type="button" value="Cancel"/>	

Use Dates

■ Use start / end dates to schedule content

Use Time

■ Use start / end time to schedule content, use hours and minutes only, no seconds.

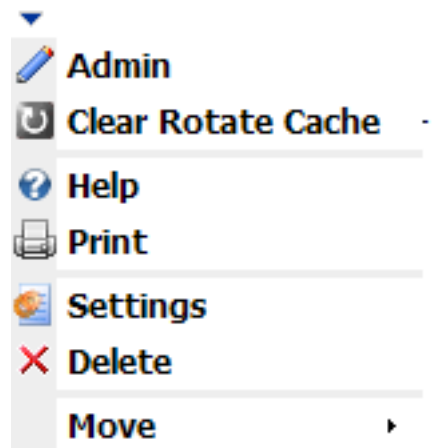

Use Days of Week

■ Specify which days of the week the content should appear.

Templates

digRotate has a very flexible template system that lets you define the way you want your digRotate module to look. Templates are not used for the Flash Rotator.

Templates are cached in memory. When you are modifying your templates, choose the **Clear Rotate Cache** menu option from the module menu to clear the template cache. Otherwise, you may not see the changes you have made to the template.

IMPORTANT: Do not modify any of the default templates that come with DigRotate. When you upgrade DigRotate in the future, you will overwrite any changes you have made. Copy the default template to a new folder and start working from there.

Standard Template Files

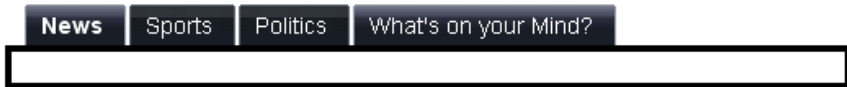

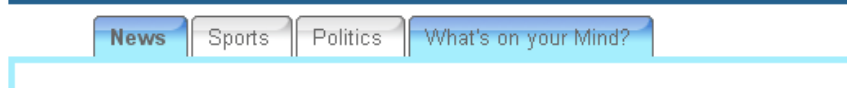

File	Description
template.css	<p>CSS Style sheet for the template. Make sure you use css names distinct to that template because you may have 2 rotators on the same page which need to have distinct css names.</p> <p>There are 2 standard css styles that are based off of the template name. They are {template_name}-Content, and {template_name}-Pager. These styles are applied to the table cells containing the pager and the content.</p>
Content.html	<p>This is the main rotator template, this will most likely only have the tag [content] but you can modify it as you wish. Anything you enter will appear on all rotation content</p>
Pager.html	<p>This is where the pager is defined.</p>
PagItem.html	<p>This is where the pager numbers are defined.</p>

Note: You can also put tags in your rotate content.

Default Rotate Templates:

	Rotate-Blue
	Rotate-Green
	Rotate-GreyDark
	Rotate-GreyLight
	Rotate-Orange
	Rotate-Red
	Buy.com
	Default
	DefaultBlue
	DefaultGreen

Default Tab Templates

	Tab-Black
	Tab-Blue
	Tab-Bottom-DD-Red
	Tab-DD-Green
	Tab-DD-Red
	Tab-GlassDark
	Tab-GlassLight
	Tab-Green
	Tab-GreyDark
	Tab-GreyFlat
	Tab-GreyLight
	Tab-Orange
	Tab-Pink
	Tab-Red

Default Vertical Menu Templates

General

Tag	Description
[ad:group:source]	<p>Display a DotNetNuke banner that is configured under the site or host Vendors section.</p> <p>Group – Banner group as defined in the settings of each banner</p> <p>Source – S for Site, or H for Host</p> <p>Examples:</p> <p>[ad:contest1:s]</p> <p>[ad:googlesense:h]</p> <div style="border: 2px solid orange; padding: 10px; margin: 10px 0;"> <p>NOTE: Javascript based ads such as Google adSense will not work if the rotator is set to any transition type other than None.</p> </div>
[tpath]	<p>Insert the path to the template folder (not including trailing slash)</p> <p>Example:</p> <p></p>

Content Tags

Tag	Description
[content]	The rotator item html content.

[title]	Rotator item title.
---------	---------------------

Pager Tags

Tag	Description
[previouslink]	Href to the previous content. Example:
[nextlink]	Href to the next content
[playlink]	Href to play rotator
[pauselink]	Href to pause the rotator
[pagelink]	Href to the content page
[ispause] [ispause:not]	Displays content inside the [ispause] tags when the rotator is paused. Example: [ispause] Press here to play[/ispause] [ispause:not] Press here to pause[/ispause:not]
[currentpage]	Page number of the current content being displayed.
[pagenumber]	The number of the content page. This is used for building the pager control.

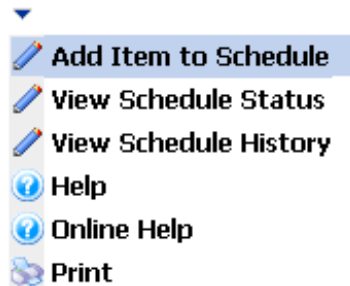

<p>[ispagecurrent] [ispagecurrent:not]</p>	<p>Display inside the [ispagecurrent] tags when the page is the current page.</p> <p>Example:</p> <pre>[ispagecurrent] [pagenumber] [[/ispagecurrent] [ispagecurrent:not] [pagenumber] [/ispagecurrent:not]</pre>
<p>[pager:template: xcount:ycount]</p>	<p>Displays the pager in <td> table cells.</p> <p>Template - this is the page number template file.</p> <p>xcount - number of columns</p> <p>ycount - number of rows.</p> <p>Example:</p> <pre>[page:pageitem:99:1]</pre>
<p>[pager:template: xcount:ycount]</p>	<p>Same as [pager], except the pager is output without table cells. This is good for css style tabs.</p>

The best resource on templates are the sample templates that come with digRotate. Use these as your base to build from.

Scheduling RSS and File System Updates

digRotate will automatically update your RSS feeds if you chose the feed to update in the digRotate settings. For this to work, you need to have Host access to create a scheduled event.

1. Go to Host > Schedule
2. Select Add Item To Schedule from the drop down menu.

3. For Full Class Name and Assembly, enter the following:
DigNuke.DNN.Modules.DigRotate.RotateScheduler,
DigNuke.DNN.Modules.DigRotate
4. Setup the schedule per your needs, if you setup your digRotate modules to refresh every hour, then have your scheduled event run every hour.

Syncing can be an intensive process, try not to sync in intervals less than 15 minutes.

End User License Agreement

Software License Agreement for DIGROTATE

IMPORTANT- PLEASE READ CAREFULLY: BY INSTALLING THE SOFTWARE (AS DEFINED BELOW), COPYING THE SOFTWARE AND/OR CLICKING ON THE 'ACCEPT' BUTTON BELOW, YOU (EITHER ON BEHALF OF YOURSELF AS AN INDIVIDUAL OR ON BEHALF OF AN ENTITY AS ITS AUTHORIZED REPRESENTATIVE) AGREE TO ALL OF THE TERMS OF THIS END USER LICENSE AGREEMENT ('AGREEMENT') REGARDING YOUR USE OF THE SOFTWARE. IF YOU DO NOT AGREE WITH ALL OF THE TERMS OF THIS AGREEMENT, CLICK ON THE 'NO' BUTTON. THIS WILL CANCEL THE INSTALLATION.

1. GRANT OF LICENSE: Subject to the terms below, DIGNUKE hereby grants you a non-exclusive, non-transferable license to install and to use DIGROTATE ('Software').

Under this license, you may: (i) install and use the Software on a single DotNetNuke installation for your use (ii) copy the Software for back-up or archival purposes. (iii) You may not distribute the software to others without first obtaining the required licenses, where applicable. (iii) install and use the Software on a single test DotNetNuke installation, not public or viewable by other users.

Whether you are licensing the Software as an individual or on behalf of an entity, you may not: (i) reverse engineer, decompile, or disassemble the Software or attempt to discover the source code; (ii) modify, or create derivative works based upon, the Software in whole or in part without the express written consent of DIGNUKE; (iii) distribute copies of the Software; (iv) remove any proprietary notices or labels on the Software; (v) resell, lease, rent, transfer, sublicense, or otherwise transfer rights to the Software.

2. DIGROTATE: You acknowledge that no title to the intellectual property in the Software is transferred to you. Title, ownership, rights, and intellectual property rights in and to the Software shall remain that of DIGNUKE. The Software is protected by copyright and patent laws of the United States and international treaties.

3. DISCLAIMER OF WARRANTY:

YOU AGREE THAT DIGNUKE HAS MADE NO EXPRESS WARRANTIES, ORAL OR WRITTEN, TO YOU REGARDING THE PRODUCTS AND THAT THE PRODUCTS ARE BEING PROVIDED TO YOU 'AS IS' WITHOUT WARRANTY OF ANY KIND. DIGNUKE DISCLAIMS ANY AND ALL OTHER WARRANTIES, WHETHER EXPRESSED, IMPLIED, OR STATUTORY. YOUR RIGHTS MAY VARY DEPENDING ON THE STATE IN WHICH YOU LIVE.

DIGNUKE SHALL NOT BE LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, COVER, RELIANCE, OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT.

4. LIMITATION OF LIABILITY: You use this program solely at your own risk.

IN NO EVENT SHALL DIGNUKE BE LIABLE TO YOU FOR ANY DAMAGES, INCLUDING BUT NOT LIMITED TO ANY LOSS, OR OTHER INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND ARISING OUT OF THE USE OF THE SOFTWARE, EVEN IF DIGNUKE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT WILL DIGNUKE BE LIABLE FOR ANY CLAIM, WHETHER IN CONTRACT, TORT, OR ANY OTHER THEORY OF LIABILITY, EXCEED THE COST OF THE SOFTWARE. THIS LIMITATION SHALL APPLY TO CLAIMS OF PERSONAL INJURY TO THE EXTENT PERMITTED BY LAW.

5. TERMINATION: This Agreement shall terminate automatically if you fail to comply with the limitations described in this Agreement. No notice shall be required to effectuate such termination. Upon termination, you must remove and destroy all copies of the Software.

6. MISCELLANEOUS:

Severability.

In the event of invalidity of any provision of this Agreement, the parties agree that such invalidity shall not affect the validity of the remaining portions of this Agreement.

Export.

You agree that you will not export or re-export the Software outside of the jurisdiction in which you obtained it without the appropriate United States or foreign government licenses.

Governing Law.

This EULA will be governed by Pennsylvania law and the United States of America, without regard to its choice of law principles. The United Nations Convention for the International Sale of Goods shall not apply.

Entire Agreement.

You agree that this is the entire agreement between you and DIGNUKE, which supersedes any prior agreement, whether written or oral, and all other communications between DIGNUKE and you relating to the subject matter of this Agreement.

Reservation of rights.

All rights not expressly granted in this Agreement are reserved by DIGNUKE.

Contact Information

If you have any questions about this EULA, or if you want to contact DIGNUKE for any reason, please direct all correspondence to: DIGNUKE, PO BOX 891, Ellwood City, PA 16117, United States of America or email info@dignuke.com.
